Haslingfield,
Cambridge,
CB23 1JL

Employment History:

Web Developer at Fluid Studios, Hertfordshire – 2016 – Current

I started my current position as a Junior Front-End Developer, responsible for the design, build and testing of responsive websites and eCommerce stores using both in-house CMS solutions and WordPress. I am now extremely confident using Photoshop, HTML5, CSS3 (Bootstrap), PHP and JavaScript (jQuery).

I quickly expanded my role into a full-stack position and have learnt a range of back-end technologies through custom development on to our CMS systems, building and maintaining bespoke Laravel solutions, job board and geolocate API integrations and developing WordPress themes. I have used Git, npm, Gulp/webpack, Sass and vue.js on some of our larger projects, and am comfortable using SSH and command line.

During my time at Fluid Studios I have been able to further my existing organisational and communication skills through project management and client training, and on top of my project work I currently manage our eCommerce, Development and Support departments.

IT tech, Phlebotomist/HCA, Receptionist, Dispenser and admin at GP Surgery Harston, 2010 – 2016

My roles at Harston Surgery involved administrative, management and clinical duties. I built on my organisational and communication skills while running a Patient Participation Group and participating in Clinical Commissioning Group meetings to plan the future of local NHS services. I was also able to utilise my IT knowledge while responsible for IT maintenance and surgery-wide hardware and software upgrades.

I used my exceptional interpersonal skills to make patients feel comfortable during clinical procedures, and to resolve issues quickly, effectively and amicably when dealing with general queries and complaints. I also became efficient in auditing and data entry whilst dispensing medications including controlled drugs and updating medical records.

Teaching assistant at Mercy Centre, Bangkok, 2013

I spent 3 months teaching English to a class of 80 Thai children in Bangkok. The class ranged in age from 3 to 8 and varied in aptitude, forcing me to develop my own communication skills, both verbal and non-verbal. I utilised my organisational skills to compose lessons plans that would keep a wide range of abilities engaged, regularly feeding back with the staff.

Qualifications and Skills:

- IT maintenance (both hardware & software)
- Computer Literate: Windows, Mac, Microsoft Office, Social Media
- Photoshop, HTML5, CSS3, PHP, MySQL, multiple JavaScript libraries, basic Pascal
- Customer service
- Basic French and Thai
- Full clean driving licence and own car
- Level 2 Dispensing Doctors (equivalent to NVQ2)
- CPR, Anaphylactic Shock & First Aid Training

Education:

2 A levels, 2 AS levels, and 10 GCSEs, ranging from grades A* to D, including Computing, Electronics, Physics and Maths (with Mechanics).

Personal:

- Several personal development projects to learn Ruby on Rails, PHP, NodeJS, ReactJS and jQuery
- Basic software development
- Youth spokesperson for local District Council

Charity work and event organisation

For several years, I teamed up with a group of three other classmates to plan and run a bi-annual live music event featuring up-and-coming local bands. Our first event was run on a tight budget, staffed by friends and family. By the end of my time at college, we were able to use previous profits to fund event security, rent festival-grade PA and lighting equipment, as well as hire professional AV technicians. We raised over £6000 profit, which we donated to a range of local children's charities.
